## **Can a man direct Twilight sequel?**

I'm a big lover of the Twilight saga and I'm not sure a man could do it. It really depends on the actors and the director. New moon has the least lovey-dovey stuff so a man could do new moon but the rest.. I'm not sure..

---

## **Super ant storms Europe**

An ant, called *Lasius neglectus*, just might be taking over. It kills native species of ants and has already invaded more than 100 areas across Europe and is coming our way. If it is not stopped it could invade the whole world. Ants may live all around the world because they can adapt to almost any habitat. The combined weight of all of the ants in the Brazilian Amazon is thought to be almost four times bigger than the combined weight of all of the mammals, birds, reptiles, and amphibians there.

## **A lean Christmas for kids**

I hate to say this but, it's about time. After Christmas I walk my dog and everyone's trash barrels are overflowing with wrapping paper, boxes and junk! People buy so much stuff for Christmas, Santa lost his job:) Now don't get me wrong , I'm not knocking presents. I love getting presents but Christmas is more than that and I hope more people realize that this Christmas.

## **Girl survives four months without a heart**

This is amazing that we can actually get people to live without a heart! I'm glad that people are working to keep people alive and researching medically and succeeding.
